

From Movies to Architecture: The Benefits of Seamless Polycarbonate Mesh

A fast-paced study in a new AIA product category: Seamless Polycarbonate Mesh. New Zealand based, Kaynemaile are the pioneers of architectural polycarbonate mesh systems. Inspired by medieval chainmail for the movie industry, Kaynemaile is extremely light and durable, visually appearing like metal.

Unlimited size allows for a wide variety of creative design solutions, minimal support frame and rapid installation... at a fraction of the cost of most metal screening products. Kaynemaile crosses over from the building envelope to interiors, making a unique statement on every job.

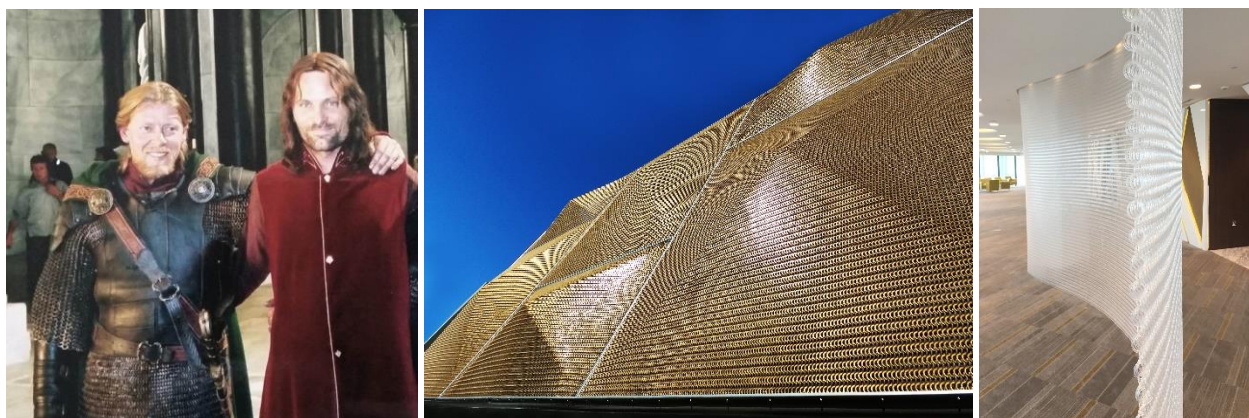

Course Outline:

- History of Kaynemaile
- Defining Seamless Polycarbonate Mesh
- Manufacturing & product properties
- Architectural benefits
- Technical data
- Maintenance
- Fixings & colours
- Interior and exterior applications
- Installation
