

Overview

- **Discuss recent advances in technology in the fields of structural glass systems and glass fabrication.**
- **Discuss architectural design trends and modern facade design best practices, including the prevalent use of jumbo glass panels in architectural applications.**
- **Review project applications that illustrate current design practices and construction techniques**

Sentech Architectural Systems is located in Austin, Texas, and specializes in the design of structural glass systems. Using state-of-the-art technology and jumbo glass panels, Sentech's highly transparent solutions have been used in convention centers, airports, churches, aquariums, libraries, museums, casinos, and high-rise building entrances throughout North America.

Structural Glass Systems, 60 minutes

Program# 20110111

Credits: 1 hour
