Creative Engineered Architectural Systems

AIA Lunch & Learn Webinars

There has been a seismic shift in how we now think about space. Join us in discussing how, through design and partnerships, we can expand the health & wellness of users in the built environment without sacrificing creativity, uniqueness or budget. **New in 2021!**

+ Open Air Steel Structures: Adding Value to the Built Environment (Course #CEAS2021)

Learning Objectives:

- How future design will place an emphasis on health, wellness, and biophilic design
- When steel is the most appropriate material choice for your project
- How different partners add value to your project in the built environment
- The value of the prefabricated approach

Duration: 60 mins

Learning Credits: 1 AIA LU/HSW credit

Dates are now scheduled and seats are available! To register or for more information, please contact:
