

The Profitability of Healthy Spaces

The Business Case for Designing with Light and Air

Kingspan Light + Air would like to invite you to attend our lunch and learn seminar. This seminar will present innovations in translucent daylighting and best practices for designing with daylighting.

Learning objectives:

1. Discuss the impact of high-performing products on the well-being and productivity of occupants, and the profitability of businesses and building owners
2. Define innovative methods to bring natural light and air into buildings
3. Identify durable and high-performing glazing materials
4. List building standards and codes applicable to designing with light and air
5. Identify case studies that illustrate the positive effect of designing with light and air.

1 hour continuing education credit for HSW for AIA members.
